Chief of Station, Guatemala

LINCOLN

Administrative
Latent Action Inks

REF: GUAT 406, Paragraphs 4 and 5

1. Attached are formulas for various types of latent action inks, which^{formulas} were forwarded to LINCOLN from Headquarters. Headquarters advises that these inks do not attack chrome, paint or glass and that KURIOT is now working on a possible solution to this problem.

2. Paragraph 8.b. of the attachment states: "Surfaces, other than paper, will probably give different delay periods also." This statement suggests that it is possible that these solutions may work on other surfaces.
